DOWNLOAD APP

Step1:Scan the given QR code ,or download "V-TAC Smart Light"from the App Store(iOS) or the Google Play Store(Android)

Scan to download app: V-TAC SMART LIGHT

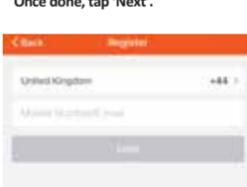

Step2: Open the V-TAC Smart Light app and register.

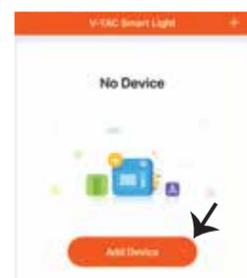

Step4: Enter the verification code which will be sent to your mobile number, then assign a new password to your account.

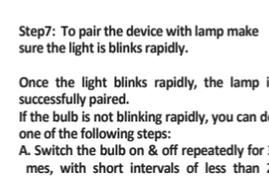

Step3: Select the country, then enter your mobile number. Once done, tap 'Next'.

Step5: Tap on 'Add Device' or the + sign. Make sure the lamp is switched on.

Step6: Choose 'Electrical Outlet' to start pairing the lamp to the app.

Step7: To pair the device with lamp make sure the light is blinking rapidly.

Once the light blinks rapidly, the lamp is successfully paired. If the bulb is not blinking rapidly, you can do one of the following steps:
A. Switch the bulb on & off repeatedly for 3 times, with short intervals of less than 2 seconds.
B. Tap the 'How to make light blink rapidly' link(as shown in the image)

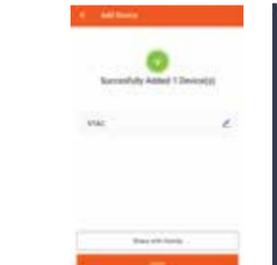

Network Modes:
1) EZ Mode: Light flashes twice per second
2) AP mode: Slow flash, once every 2 seconds

On the "Add device" page, confirm whether the bulb is on EZ mode. If not, you can switch to EZ mode by a switching the device on three times.

Confirm if the light blinks rapidly, select the WiFi network, and enter the password.

Step8: You will be redirected to this screen as shown below. Wait until the device finishes pairing.

Step9: Once your device is successfully added, rename the device to your preference.

Step10: After successfully pairing the bulb with the app, you can start controlling multiple features of the bulb through your mobile—on/off switch, changing the colour temperature, dimming & schedules, dimming options, and more.

ALEXA SETTINGS

Step1:Install the Amazon Alexa app via the App Store (iOS) or the Play Store (Android) and register. If you already have an existing account with Amazon Alexa, please proceed to logging in.

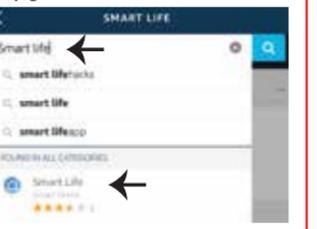

Step3: Tap 'Your Smart Home Skills' to proceed with adding new skills.

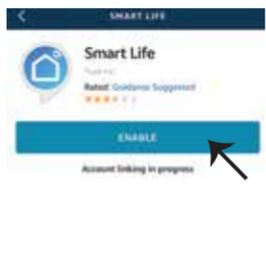

Step2: Once you are on the Amazon Alexa home page, click on the lower right icon—where the arrow is pointed—to add a new device and skill.

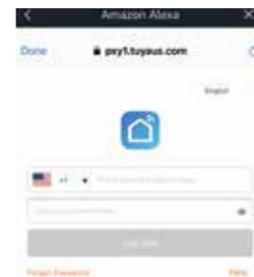

Step4: Search for 'Smart Life' on the Skills page's search bar.

Step5: Enable the Skill.

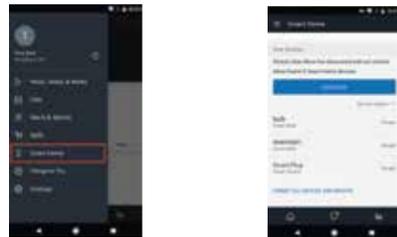

Step6: If you have an existing Smart Life account, proceed with logging in. If not, tap register.

Step7: Select 'V-TAC Smart Light' and tap 'Link Now' to start linking the app to Amazon Alexa.

Step8: Discover your smart device on Alexa. You can say "Alexa discover devices" to the Alexa device which you have. OR you can add new devices manually (As shown below). Once the device is discovered you can now control your smart device using Alexa.

Note: Discovering the device must be done every time the device's name is changed on the app.

ALEXA Commands

Now, you can control your smart device using voice commands on Alexa. Below are a few commands you can use:

- >! Alexa, turn on/off bedroom light
